

TECHBIG Solutions

SAP S/4HANA Finance (FICO)
Complete E2E Implementation Program

Course Positioning: From Finance Fundamentals to S/4HANA Real-Time Implementation

Recommended Training Methodology: 30% Theory + 70% Hands-on

Learning Cycle: Learn → Configure → Execute → Integrate → Test → Close → Report → Troubleshoot → Implement

COMPLETE COURSE SYLLABUS

MODULE 1 – SAP ERP & S/4HANA INTRODUCTION

- SAP overview; SAP ERP; SAP S/4HANA; SAP S/4HANA Finance; ECC vs S/4HANA; SAP modules; functional vs technical roles.
- S/4HANA architecture: SAP HANA database, in-memory computing, SAP Fiori, SAP GUI, embedded analytics, Universal Journal, Business Partner, ACDOCA, simplification items.
- Finance architecture: FI, CO, integration, ledgers, currencies and real-time accounting.

MODULE 2 – FINANCE & ACCOUNTING FUNDAMENTALS

- Debit/credit; assets; liabilities; equity; revenue; expenses; profit and loss; balance sheet; trial balance.
- Financial statements: Balance Sheet, P&L, cash-flow overview, profit center and segment reporting.
- SAP terminology: Company, Company Code, Chart of Accounts, Fiscal Year, Posting Period, Currency, Controlling Area, Business Area, Profit Center and Segment.

MODULE 3 – S/4HANA ENTERPRISE STRUCTURE

- Company; Company Code; Business Area; Functional Area; Controlling Area; Profit Center; Segment; Plant; Purchasing Organization; Sales Organization.
- Assignments and integration of enterprise structure.
- Practical: create a sample TECHBIG Global enterprise structure with company code, currency, fiscal year and controlling area.

MODULE 4 – GLOBAL SETTINGS FOR FINANCE

- Fiscal Year Variant; Posting Period Variant; Document Types; Number Ranges; Posting Keys; Field Status Variant/Groups; Tolerance Groups; posting periods; ledgers; currencies; exchange rates.

MODULE 5 – GENERAL LEDGER ACCOUNTING

- Chart of Accounts; operating/country/group charts; account groups; G/L master; G/L account types.
- G/L master configuration: field status, open-item management, line-item display, tax category, reconciliation accounts and S/4HANA cost element integration.
- Journal entries, reversals, parked/held documents, document types and automatic account determination.

MODULE 6 – ACCOUNTS PAYABLE (AP)

- Business Partner and supplier master; roles; account groups; number ranges; reconciliation account; payment terms.
- Vendor invoices, credit/debit memos, down payments, advances, payments, partial/residual payments and clearing.
- Automatic Payment Program: payment methods, house banks, proposal, payment run and exceptions.
- AP reporting: open items, cleared items, balances and aging.

MODULE 7 – ACCOUNTS RECEIVABLE (AR)

- Customer/Business Partner; customer account group; reconciliation account; payment terms and dunning.
- Customer invoices, credit/debit memos, receipts, down payments, partial/residual payments and clearing.
- Dunning procedures, levels, intervals, charges and notices.
- AR reporting: balances, aging, open/cleared items and line items.

MODULE 8 – BANK ACCOUNTING

- Bank master; house bank; account ID; bank G/Ls; incoming/outgoing payments; clearing accounts.
- Manual bank reconciliation; Electronic Bank Statement; account symbols; posting rules; interpretation algorithms.
- Cash management overview, bank account management, liquidity overview and cash position.

MODULE 9 – ASSET ACCOUNTING

- Asset classes; number ranges; asset master; account determination; depreciation areas; useful life; depreciation keys.
- Acquisition, vendor acquisition, transfer, retirement, sale, scrapping, disposal and Assets Under Construction.
- Ordinary/special/unplanned depreciation and depreciation run.
- Asset history sheet, balances and transaction reporting.

MODULE 10 – TAX CONFIGURATION

- Input/output tax; tax codes; tax procedure; tax accounts; tax determination.
- India/GST overview: CGST, SGST, IGST, input/output GST, reverse charge and reporting overview.

MODULE 11 – FOREIGN CURRENCY

- Currency types; exchange rate types; rate maintenance; foreign currency transactions; realized/unrealized gains and losses; foreign currency valuation configuration.

MODULE 12 – SPECIAL G/L TRANSACTIONS

- Special G/L concept; down payments; bills of exchange overview; guarantees; alternative reconciliation accounts; special G/L indicators for customers and vendors.

MODULE 13 – FINANCIAL DOCUMENT CONTROL

- Document types; number ranges; posting keys; field status; references; reversals; parking; changes; document splitting.
- Document splitting: characteristics, business transactions, zero balance, profit center balancing and segment reporting.

MODULE 14 – LEDGER & PARALLEL ACCOUNTING

- Leading/non-leading ledgers; extension ledgers; ledger groups; accounting principles; parallel accounting; local GAAP; IFRS; currencies and ledger configuration.

MODULE 15 – CONTROLLING (CO) FUNDAMENTALS

- FI vs CO; management accounting; controlling area; cost objects; cost centers; profit centers; internal orders; profitability analysis.
- Universal Journal, FI-CO integration, primary and secondary cost postings and S/4HANA cost element concept.

MODULE 16 – COST CENTER ACCOUNTING

- Cost centers; standard hierarchy; groups; activity types; statistical key figures.
- Actual postings; allocations; assessments; distributions; activity allocation and reposting.
- Actuals, plan vs actual and variance reporting.

MODULE 17 – INTERNAL ORDERS

- Order types; number ranges; real/statistical orders; budgeting; availability control; actual postings and settlement.
- Settlement profile, settlement rules, receivers, periodic and full settlement.

MODULE 18 – PROFIT CENTER ACCOUNTING

- Profit center hierarchy/master; assignments to cost centers/materials; revenue/expense postings; document flow; reporting; segment reporting.

MODULE 19 – PRODUCT COSTING

- Product costing; costing variants; costing sheets; cost components; BOM; routing; activity prices; material costs; overhead.
- Standard cost estimate: create, mark, release, analyze and cost-component reporting.

MODULE 20 – MATERIAL LEDGER & ACTUAL COSTING

- Material Ledger; actual costing; price determination; standard/moving-average price; periodic unit price; actual cost calculation; price analysis and period-end processing.

MODULE 21 – PROFITABILITY ANALYSIS (CO-PA)

- Account-based CO-PA; costing-based CO-PA overview; operating concern; characteristics; value fields overview; profitability segments.
- Revenue, COGS, discounts, deductions, cost postings, allocation and assessment.
- Contribution margin, customer/product/market profitability reporting.

MODULE 22 – PERIOD-END CLOSING

- FI month-end: posting periods, accruals, provisions, recurring entries, foreign currency valuation, GR/IR clearing, customer/vendor clearing, bank reconciliation, depreciation and reporting.
- CO month-end: allocations, assessment, distribution, activity allocation, internal order settlement, profit center activities, WIP, variance calculation and settlement.

MODULE 23 – YEAR-END CLOSING

- Year-end process; balance carryforward; customer/vendor carryforward; asset carryforward; P&L; carryforward; foreign currency valuation; audit requirements and financial statements.

MODULE 24 – FI-MM INTEGRATION

- Procure-to-Pay: PR → PO → GR → IR → Payment.
- Accounting flows and automatic account determination; valuation class; account category reference; OBYC concept; price differences; GR/IR clearing.

MODULE 25 – FI-SD INTEGRATION

- Order-to-Cash: Customer → Sales Order → Delivery → PGI → Billing → Receipt.
- COGS, inventory, revenue, customer and bank accounting flows; revenue/customer account determination; tax and pricing integration.

MODULE 26 – FI-AA / FI-MM / FI-SD / CO INTEGRATION

- End-to-end integration scenarios for P2P, O2C, asset lifecycle, cost center and profit center processes.

MODULE 27 – S/4HANA UNIVERSAL JOURNAL

- ACDOCA and Universal Journal; FI + CO integration; line-item architecture; real-time accounting; profit center, segment, functional area and currency dimensions.
- S/4HANA changes: Universal Journal, Business Partner, New Asset Accounting, Material Ledger, simplified data model, Fiori and embedded analytics.

MODULE 28 – SAP FIORI FOR FINANCE

- Fiori Launchpad; tiles; spaces; pages; business catalogs and business roles.
- Finance apps for journal entries, G/L, supplier/customer line items, fixed assets, payments, financial statements, trial balance, balance sheet and P&L.;

MODULE 29 – FINANCIAL REPORTING

- Trial Balance; Balance Sheet; P&L; G/L line items; customer/vendor balances; asset, cost center and profit center reports.
- Embedded analytics; CDS-based reporting overview; Fiori analytical apps; real-time reporting and KPIs.

MODULE 30 – COMPLETE CONFIGURATION PROJECT

- Configure a complete sample company: enterprise structure, G/L, Business Partners, customers, suppliers, bank, tax, Asset Accounting, Controlling Area, cost centers, profit centers, internal orders, CO-PA, MM and SD integration.

MODULE 31 – COMPLETE E2E BUSINESS CYCLE

- P2P: Supplier → PO → GR → Invoice → Payment → Clearing → G/L → Financial Statements.
- O2C: Customer → Sales Order → Delivery → PGI → Billing → Receipt → Clearing → Revenue/COGS → Profitability.
- Asset lifecycle: create → acquire → depreciate → transfer → retire → report.
- Month-end: AP, AR, bank, depreciation, FX valuation, accruals, GR/IR, CO allocations, settlement and reporting.

MODULE 32 – SAP IMPLEMENTATION METHODOLOGY

- SAP Activate: Discover, Prepare, Explore, Realize, Deploy and Run.
- Documents: Business Requirement, Business Process, Configuration, Functional Specification, Test Scripts, UAT, Cutover Plan, Go-Live Checklist and Support Documentation.

MODULE 33 – REAL-TIME PROJECT LIFE CYCLE

- Requirement gathering; As-Is/To-Be; gap analysis; configuration; master data; integration; unit/SIT/UAT testing; migration; cutover; go-live; hypercare.

MODULE 34 – PRODUCTION SUPPORT

- Incident handling, P1/P2/P3/P4, SLA, root-cause analysis, functional debugging and documentation.
- Common FI issues: periods, account determination, tax, payment, clearing, FX, BP, asset and bank issues.
- Common CO issues: cost center, profit center, settlement, allocation, activity type and planning issues.

MODULE 35 – INTERVIEW PREPARATION

- FI: enterprise structure, G/L, AP, AR, AA, bank, tax, FX, ledgers, document splitting and closing.
- CO: controlling area, cost center, profit center, internal order, activity type, allocations, settlement, product costing, Material Ledger and CO-PA.
- S/4HANA: ACDOCA, Business Partner, New Asset Accounting, Material Ledger, Fiori, embedded analytics, migration and SAP Activate.

MODULE 36 – REAL-TIME SCENARIOS & CASE STUDIES

- Two legal entities and separate financial statements; IFRS/local GAAP; uncleared customer payments; incorrect tax; depreciation errors; GR/IR balances; FX valuation; missing profit center; MM account determination; SD billing/FI posting issues.

MODULE 37 – FINAL CAPSTONE PROJECT

- Implement S/4HANA Finance for TECHBIG Global Solutions Pvt. Ltd.

- Scope: FI, CO, AP, AR, AA, Bank, Tax, FX, closing, reporting, FI-MM, FI-SD, FI-AA and CO-PA.
- Deliverables: BRD, BPD, enterprise structure, configuration document, master-data template, functional specification, unit/SIT/UAT scripts, defect log, cutover plan, go-live checklist, support matrix and project presentation.

MODULE 38 – PRACTICAL ASSESSMENT

- Finance fundamentals; FI configuration; AP/AR; Asset Accounting; CO; FI-MM; FI-SD; month-end closing; troubleshooting; final E2E implementation project.

RECOMMENDED COURSE DURATION

Option A – Job-Oriented Program: 16 Weeks

Week 1–2: SAP + Finance Fundamentals | Week 3–6: FI | Week 7–9: AP/AR/AA/Bank | Week 10–12: CO | Week 13: Integration | Week 14: Closing & Reporting | Week 15: Implementation Methodology | Week 16: Capstone + Interview Preparation

Option B – Intensive Program: 12 Weeks

5–6 days per week with strong hands-on practice.

Option C – Professional E2E Program: 20 Weeks

Best for candidates requiring fundamentals, configuration, integration, real-time implementation, support, migration, testing, project documentation and interview preparation.

STUDENT OUTCOMES

By completion, learners should be able to configure FI/CO, execute AP/AR/AA/bank processes, perform closing, work with Universal Journal and Fiori, understand FI-MM/FI-SD integration, prepare implementation documents, test and migrate data, support cutover/go-live and troubleshoot production issues.

TECHBIG SOLUTIONS – COURSE USP

Course Name: SAP S/4HANA Finance (FICO) – E2E Implementation & Real-Time Project Training

Target Audience: Finance professionals, SAP FICO beginners, ECC FICO professionals upgrading to S/4HANA, commerce/finance graduates, SAP consultants and IT professionals moving into SAP Finance.

Final Certificate: TECHBIG Solutions – Certificate in SAP S/4HANA Finance (FICO) E2E Implementation
