SAP S/4HANA Sales & Distribution (SD)
Complete E2E Implementation Program

Course Positioning: From Sales Fundamentals to S/4HANA Real-Time SD Implementation

Recommended Methodology: 30% Theory + 70% Hands-on

Learning Cycle: Learn → Configure → Execute → Integrate → Test → Troubleshoot → Implement

COMPLETE SAP S/4HANA SD SYLLABUS

MODULE 1 – SAP S/4HANA SALES INTRODUCTION

- SAP overview; ECC vs S/4HANA; S/4HANA Sales architecture; SAP Fiori; HANA database; Sales and Distribution within S/4HANA.
- Sales business processes; Order-to-Cash overview; presales, sales order management, shipping, billing and receivables.
- Key S/4HANA Sales changes: Business Partner, simplified master data, Fiori apps, embedded analytics and real-time process monitoring.

MODULE 2 – SD ORGANIZATIONAL STRUCTURE

- Company; Company Code; Sales Organization; Distribution Channel; Division; Sales Area.
- Plant; Shipping Point; Loading Point; Sales Office; Sales Group.
- Assignments between sales organization, company code, distribution channel, division, plant and shipping point.
- Enterprise structure design for domestic, export and multi-company scenarios.

MODULE 3 – BUSINESS PARTNER & CUSTOMER MASTER

- Business Partner concept in S/4HANA; customer roles; BP grouping and number ranges.
- General data; company-code data; sales-area data; payment terms; reconciliation account; partner functions.
- Customer account groups, one-time customers, contact persons and master-data governance.
- Create/change/display Business Partners and troubleshoot common master-data issues.

MODULE 4 – MATERIAL / PRODUCT MASTER FOR SALES

- Material/Product Master relevant to SD; sales views; sales organization/distribution channel data; plant data.
- Material types; item categories; availability; tax classification; delivering plant; transportation data.
- Units of measure, material groups, product hierarchy and cross-module master-data integration.

MODULE 5 – CUSTOMER-MATERIAL & MASTER DATA

- Customer-material info records; customer-specific material numbers; delivery priorities; shipping conditions.
- Partner functions; texts; output-related master data; customer hierarchy overview.

MODULE 6 – PRESALES PROCESS

- Inquiry; quotation; quotation validity; reference documents; document flow.
- Quotation creation/change/display; quotation to sales order; inquiry to quotation; follow-up processing.
- Presales analytics and monitoring.

MODULE 7 – SALES ORDER MANAGEMENT

- Sales document structure: header, item and schedule line.
- Sales order types; number ranges; item categories; schedule line categories; document flow.
- Standard order; rush order; cash sales; returns-related orders; free-of-charge orders; third-party overview.
- Order blocks, delivery blocks, billing blocks, incompleteness log and copy control.

MODULE 8 – AVAILABILITY CHECK & REQUIREMENTS

- Availability check/ATP concepts; checking groups; checking rules; scope of check.

- Transfer of requirements to MRP; confirmed quantities; backorder processing overview.
- Material availability, scheduling and sourcing integration with MM/PP.

MODULE 9 – PRICING & CONDITION TECHNIQUE

- Pricing procedure; condition types; access sequences; condition tables; condition records.
- Base price; discounts; surcharges; freight; taxes; statistical conditions.
- Manual conditions; scales; validity; exclusions; condition supplements.
- Pricing determination in sales documents and troubleshooting pricing errors.

MODULE 10 – TAX DETERMINATION

- Tax classification; customer/material tax indicators; country/region considerations.
- Tax condition types; tax codes; output tax; integration with FI.
- India GST overview: CGST, SGST, IGST and practical sales-tax determination concepts.

MODULE 11 – DELIVERY PROCESSING

- Outbound delivery creation; delivery types; item categories; delivery split.
- Picking; packing; batch determination; serial numbers; route/shipping point determination.
- Delivery due list; delivery processing; delivery blocks; partial and complete deliveries.
- Post Goods Issue (PGI), reversals and stock/accounting impact.

MODULE 12 – SHIPPING & TRANSPORTATION INTEGRATION

- Shipping point determination; route determination; transportation scheduling.
- Loading; picking; packing; shipment/freight integration overview.
- Integration with SAP EWM/TM overview and warehouse execution concepts.

MODULE 13 – BILLING

- Billing types; billing due list; invoice creation with reference to delivery/order.
- Invoice, credit memo, debit memo, cancellation, pro forma and intercompany billing.
- Billing plans; milestone/periodic billing; down-payment billing overview.
- Billing blocks, copy control, account determination and output.

MODULE 14 – ACCOUNT DETERMINATION

- Revenue account determination; account keys; condition technique.
- Customer/material/account assignment; automatic account determination.
- COGS and revenue integration; troubleshooting missing/incorrect G/L determination.

MODULE 15 – SD-FI INTEGRATION

- Sales order → delivery → PGI → billing → accounting.
- PGI updates inventory and accounting; billing posts customer receivables and revenue.
- Customer incoming payment and clearing; document flow across SD, MM and FI.
- Down-payment integration and special G/L overview.

MODULE 16 – SD-MM INTEGRATION

- Material availability; inventory sourcing; outbound delivery; PGI.

- Stock determination; batch management; movement types and inventory impact.
- Third-party and external procurement integration with MM.

MODULE 17 – SD-PP / MRP INTEGRATION

- Sales requirements; MRP interaction; make-to-stock and make-to-order overview.
- Planned orders/production orders; availability and delivery scheduling.
- Production and sales integration scenarios.

MODULE 18 – SPECIAL SALES PROCESSES

- Make-to-order; third-party sales; individual purchase order.
- Consignment fill-up, issue, pick-up and return.
- Free-of-charge delivery; rush order; cash sales.
- Returns; returns delivery; inspection/credit process overview.

MODULE 19 – INTERCOMPANY SALES

- Intercompany sales process; supplying plant; delivering company code; selling company code.
- Intercompany billing; customer/vendor relationships; FI integration.
- Stock transfer/intercompany process overview and troubleshooting.

MODULE 20 – OUTPUT MANAGEMENT

- Output/message determination; output types; condition records; communication channels.
- Print, email and electronic output concepts; billing output; delivery output.
- Output management in S/4HANA and troubleshooting.

MODULE 21 – COPY CONTROL & DOCUMENT FLOW

- Copy control principles; data transfer routines; requirements; pricing and quantity transfer.
- Quotation-to-order, order-to-delivery and delivery-to-billing document flow.
- Document flow analysis and common copy-control issues.

MODULE 22 – RETURNS & COMPLAINTS

- Customer returns; returns order; returns delivery; inspection and refund/credit.
- Credit memo request; debit memo request; complaint processing.
- Free-of-charge replacement and follow-up documents.

MODULE 23 – CREDIT MANAGEMENT

- Credit management concepts in S/4HANA; credit segments; credit exposure.
- Credit checks; risk classes; credit limits; blocked sales orders.
- Credit decision processing and integration with Finance.

MODULE 24 – REBATES / SETTLEMENT MANAGEMENT OVERVIEW

- Condition-based sales incentives; settlement concepts; customer rebates overview.
- Condition contracts and settlement management overview in S/4HANA.
- Accruals, settlement and accounting integration concepts.

MODULE 25 – FOREIGN TRADE / EXPORT SALES OVERVIEW

- Export sales process; shipping conditions; Incoterms; foreign currency.
- International customer/material data; export documentation overview; billing and FI integration.
- Basic compliance and trade-process concepts.

MODULE 26 – FIORI FOR S/4HANA SALES

- Fiori Launchpad; spaces/pages; business roles and catalogs.
- Manage Sales Orders; Manage Customer Returns; Manage Outbound Deliveries; billing and monitoring apps.
- Sales order fulfillment, delivery monitoring, billing and embedded analytics.

MODULE 27 – SALES ANALYTICS & MONITORING

- Sales order monitoring; delivery monitoring; billing monitoring; order fulfillment KPIs.
- Embedded analytics; real-time reporting; customer/sales performance analysis.
- Backorder monitoring and exception management overview.

MODULE 28 – S/4HANA SALES ADVANCED FEATURES

- Flexible workflows; situation handling; automation; predictive and analytical capabilities.
- Advanced ATP overview; delivery scheduling; product allocation overview.
- AI-assisted sales-order entry and modern S/4HANA sales capabilities overview.

MODULE 29 – INTEGRATION WITH FINANCE, MM, PP, EWM & TM

- End-to-end integration of sales with Finance, Materials Management, Production Planning, EWM and Transportation Management.
- Accounting impact of PGI and billing; inventory and sourcing; warehouse picking/packing; transport execution.

MODULE 30 – SAP IMPLEMENTATION METHODOLOGY

- SAP Activate: Prepare, Explore, Realize, Deploy and Run.
- Fit-to-standard; requirements; As-Is/To-Be; gap analysis; configuration; testing; migration; cutover; go-live and hypercare.
- SD project documents: BRD, BPD, configuration document, functional specification, test scripts, defect log, cutover plan and support matrix.

MODULE 31 – DATA MIGRATION

- Customer/BP migration; material/product migration; pricing condition data; open sales documents overview.
- Legacy-to-S/4HANA mapping; data cleansing; migration templates; validation and reconciliation.
- Migration cockpit concepts and mock migration testing.

MODULE 32 – TESTING

- Unit Testing; System Integration Testing; User Acceptance Testing; regression testing.
- Complete O2C test scenarios; negative testing; defect lifecycle; retesting and business sign-off.

MODULE 33 – PRODUCTION SUPPORT

- Incident priorities, SLA, root-cause analysis and functional troubleshooting.

- Common SD issues: pricing errors, ATP failures, delivery blocks, shipping-point errors, PGI failures, billing blocks, account determination and output issues.
- Support documentation, ticket analysis, debugging and business-user communication.

MODULE 34 – REAL-TIME E2E BUSINESS SCENARIOS

- Standard Order-to-Cash: Inquiry → Quotation → Sales Order → Delivery → Picking/Packing → PGI → Billing → Customer Payment.
- Make-to-order; third-party; consignment; returns; credit/debit memo; intercompany sales.
- Complete SD-FI and SD-MM integration with document flow and accounting analysis.

MODULE 35 – FINAL CAPSTONE PROJECT

- Implement SAP S/4HANA Sales for TECHBIG Global Solutions Pvt. Ltd.
- Configure enterprise structure, Business Partner/customer master, material sales data, sales documents, pricing, ATP, delivery, shipping, billing, output, account determination and credit management.
- Execute complete O2C, returns, third-party, intercompany and make-to-order scenarios.
- Deliverables: BRD, BPD, configuration document, master-data templates, pricing template, test scripts, defect log, cutover plan, go-live checklist and support matrix.

MODULE 36 – INTERVIEW & PRACTICAL ASSESSMENT

- SD fundamentals; enterprise structure; master data; sales documents; pricing; ATP; delivery; shipping; billing; account determination; credit management; special processes; integration; S/4HANA changes.
- Hands-on assessments: BP/customer, material, inquiry, quotation, sales order, delivery, PGI, billing, returns, pricing and troubleshooting.
- Final assessment: complete E2E Order-to-Cash implementation case study.

RECOMMENDED COURSE DURATION

Option A – Job-Oriented: 16 Weeks

Weeks 1–2: SAP/S4HANA + SD fundamentals | Weeks 3–5: Enterprise & Master Data | Weeks 6–9: Sales & Pricing | Weeks 10–12: Delivery, Shipping & Billing | Week 13: Integration | Week 14: Advanced Sales Processes | Week 15: Implementation/Testing | Week 16: Capstone + Interview.

Option B – Intensive: 12 Weeks

5–6 days per week with strong hands-on practice.

Option C – Professional E2E: 20 Weeks

Includes configuration, integration, migration, testing, implementation documentation, go-live and production support.

STUDENT OUTCOMES

After completing the program, learners should be able to configure and execute SAP S/4HANA Sales processes, manage Business Partner/customer and material master data, execute presales and Order-to-Cash, configure pricing, availability, delivery, shipping, billing, account determination and credit management, work with Fiori Sales applications, understand SD-FI/MM/PP/EWM/TM integration, participate in implementation, testing, migration, go-live and production support.

TECHBIG SOLUTIONS – COURSE USP

Course Name: SAP S/4HANA Sales & Distribution (SD) – E2E Implementation & Real-Time Project Training

Target Audience: SAP SD beginners, sales professionals, supply-chain professionals, commerce/business graduates, SAP ECC SD professionals upgrading to S/4HANA and IT professionals moving into SAP SD.

Final Certificate: TECHBIG Solutions – Certificate in SAP S/4HANA Sales & Distribution (SD) E2E Implementation
